11th March 2020

Dear Parents/Carers,

Celebration of Sound and Electricity Exhibition.

The Year 4 Team would like to invite you to our Celebration of Sound and Electricity Exhibition on Wednesday 1st April 2020 from 5:30pm - 6:30pm.

This half term Year 4 will be creating a piece of music to accompany a video clip using Music Maker Jam on the I-pads. They will be exploring different pitches and notes that create music. The music created will be played through the exhibition. During the evening you will also be able to explore your child's topic book, create an electrical circuit with the assistance of the children and look at the art work inspired by Kandinsky.

We look forward to seeing you and showing the children's creativity.

Science Week

During Science Week (w/c 23rd March), Year 4 will be having a visitor in to talk to the children about renewable energy around the world. We will also be creating projects with electricity and states of matter and making rice crispy cakes. Please provide your child with a small plastic bowl and spoon to be brought into school in a named bag.

Also as part of our science week Year 4 have the opportunity to visit West Solent Solar Farm. The visit will take place in the morning. We will travel by school minibus in small groups and return to school for lunchtime.

Skylark - Tuesday 24th and Wednesday 25th March

Kingfisher - Thursday 26th and Friday 27th March

For this trip, children will need to bring in suitable outdoor shoes to change into and a hooded coat in case it rains.

Yours faithfully

The Year 4 team
